Education

Vellore Institute of Technology, Vellore

September 2022 - April 2026

Bachelor of Technology in Computer Science and Engineering, CGPA: 7.8/10

Professional Experience

Praan Health | *Full-Stack Engineer*

June 2026 - Present

- Built a role-based clinic administration dashboard in React and TypeScript on Firebase for member management, bookings, rescheduling, clinical notes, and health-pass redemption
- Designed and implemented the end-to-end integration of VALD Dynamo and HumanTrak, normalizing nested biomechanical data (strength, balance, mobility, ROM, gait) into a reporting engine powering patient reports and custom Body Age, Quality of Life, and health-risk assessments
- Engineered a Python middleware service on Google Cloud Run integrating Eka Care's appointment API with Firestore for patient sync, slot booking, and rescheduling
- Contributed feature enhancements and production bug fixes across the Praan Health mobile app (React Native/Expo), care-team platform, and CI/CD deployment pipeline

CivilBrains.ai | *Software Developer Intern*

April 2025 - September 2025

- Developed scalable backend infrastructure using RESTful APIs enabling automated chatbot-database integration, improving service delivery and reducing manual data entry by 60% across internal teams
- Constructed Python-based data processing pipeline using Pandas handling 10,000+ rows and integrated 4 LLMs using LangChain, improving data quality from 65% to 92%

Technical Projects

Leather Defect Classification System | *Python, PyTorch, Streamlit, Scikit-learn*

September 2025 - November 2025

- Designed convolutional neural network for automated leather defect detection achieving 85% validation accuracy, reducing manual inspection time by 50%, with data augmentation (rotation, flipping, scaling) across 2,000+ images cutting overfitting by 15%
- Launched interactive Streamlit web application with binary classification filter enabling real-time image classification with sub-2-second response times

FireDoc — Firestore Schema Documentation Generator | *Node.js, Zod, Firestore*

June 2026

- Authored an open-source Node.js CLI that crawls Firestore and auto-generates schema documentation, relationship maps, and data-quality reports through six analyzers and a work-queue crawler
- Enforced a read-only-by-design security model using ADC-based auth with no key files, backed by unit, integration, and dedicated security tests asserting no write tokens exist

Task Manager Application | *MongoDB, Express.js, React.js, Node.js, JWT, Axios*

January 2025 - March 2025

- Created scalable full-stack web application with JWT authentication layer successfully handling 500+ concurrent users with 99.5% uptime during testing
- Enhanced database performance through MongoDB query refinement, indexing, and caching strategies, optimizing average API response time by 40% from 800ms to 480ms

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, HTML, CSS

Web Development: React.js, React Native (Expo), Next.js, Node.js, Express.js, RESTful APIs, JWT/OAuth

Machine Learning: PyTorch, Scikit-learn, NumPy, Pandas

Frameworks & Libraries: LangChain, LangGraph, Streamlit

Developer Tools: Git, GitHub, Docker, CI/CD, Postman, VS Code, Google Cloud Run

Databases: MongoDB, Firebase, PostgreSQL, MySQL (SQL & NoSQL), RDBMS

Leadership & Activities

IEEE Professional Communication Society, VIT Vellore | *General Secretary*

January 2025 - March 2025

- Coordinated recruitment drives increasing active membership from 80 to 112 members representing 40% growth through social media campaigns and outreach
- Managed 10+ technical workshops and 5 industry speaker sessions reaching 500+ students across campus, securing sponsorships worth Rs. 50,000

Certifications

Supervised Machine Learning: Regression and Classification - Andrew Ng, Coursera

Unsupervised Learning, Recommenders, Reinforcement Learning - Andrew Ng, Coursera

Python for Data Science, AI & Development - IBM, Coursera

Microsoft Azure AI Fundamentals (AI-900) - Microsoft
