Education

Vellore Institute of Technology, Vellore

September 2022 - April 2026

Bachelor of Technology in Computer Science and Engineering, CGPA: 7.8/10

Technical Skills

Programming Languages: Python, JavaScript, Java, SQL, HTML, CSS

Web Development: React.js, Node.js, Express.js, RESTful APIs, JWT Authentication, Axios, JSON

Machine Learning: PyTorch, Scikit-learn, TensorFlow, NumPy, Pandas, Model Training, Hyperparameter Tuning

Frameworks & Libraries: LangChain, LangGraph, Streamlit, FastAPI, Flask

Developer Tools: Git, GitHub, Postman, Docker, VS Code, Thunder Client

Databases: MongoDB, PostgreSQL, MySQL, Supabase

Cloud Platforms: Microsoft Azure, Docker Containerization, CI/CD Pipelines

Professional Experience

CivilBrains.ai | Software Developer Intern

April 2025 - September 2025

- Developed Model Context Protocol server with RESTful API enabling automated chatbot-database integration, cutting manual data entry by 60% across internal teams
- Constructed Python-based Excel parsing pipeline using Pandas processing 10,000+ rows and integrated 4 LLMs using LangChain, improving data quality from 65% to 92%
- Executed comprehensive QA testing across 15+ features, documented 30+ critical defects, and implemented error handling reducing production issues by 40%

Technical Projects

Leather Defect Classification System | Python, PyTorch, Streamlit, Scikit-learn

September 2025 - November 2025

- Designed convolutional neural network for automated leather defect detection achieving 85% validation accuracy, reducing manual inspection time by 50%
- Applied advanced data augmentation techniques including rotation, flipping, scaling across 2,000+ training images, decreasing model overfitting by 15%
- Launched interactive Streamlit web application with binary classification filter enabling real-time image classification with sub-2-second response times

Offline Chatbot using LangChain and LLaMA2 | Python, LangChain, LLaMA2, Ollama

March 2025 - April 2025

- Built privacy-focused conversational AI system using LLaMA2 delivering 90% response accuracy across 100+ test queries, eliminating cloud dependencies
- Established 4 contextual prompt chains with ConversationBufferMemory module which lowered ambiguous responses by 20%, enhancing dialogue coherence significantly
- Implemented local inference environment using Ollama runtime achieving 30% latency reduction with 1.2s average query response versus cloud alternatives

Task Manager Application | MongoDB, Express.js, React.js, Node.js, JWT, Axios

January 2025 - March 2025

- Created full-stack task management platform with JWT authentication layer successfully handling 500+ concurrent users with 99.5% uptime during testing
- Configured robust security architecture using JSON Web Tokens and bcrypt hashing algorithm preventing unauthorized access and ensuring data privacy
- Enhanced database performance through MongoDB query refinement and strategic indexing, optimized average API response time by 40% from 800ms to 480ms

Leadership & Activities

IEEE Professional Communication Society, VIT Vellore | General Secretary

January 2025 - March 2025

- Coordinated recruitment drives increasing active membership from 80 to 112 members representing 40% growth through social media campaigns and outreach
- Managed 10+ technical workshops and 5 industry speaker sessions reaching 500+ students across campus, securing sponsorships worth Rs. 50,000
- Supervised cross-functional team of 10 members handling marketing, content, logistics improving event attendance by 60% through data-driven strategies

Certifications

Supervised Machine Learning: Regression and Classification - Andrew Ng, Coursera

Unsupervised Learning, Recommenders, Reinforcement Learning - Andrew Ng, Coursera

Python for Data Science, AI & Development - IBM, Coursera

Microsoft Azure AI Fundamentals (AI-900) - Microsoft
